Hunter Web Services, Inc.
2810 N Church Street
Suite 50754
Wilmington, DE 19802
United States

To Whom It May Concern:

In December of 2021, the Bishop Fox assessment team conducted a limited penetration test of the Hunter.io application and its external infrastructure, a cloud security review of its GCP environment, and a review of the responses Hunter Web Services, Inc. provided for a self-assessment questionnaire. For detailed information on the products and Google APIs in scope, please see Appendix A.

This testing was designed to support Google's platform risk management function, and as such the activities should not be considered a comprehensive assessment wholly or in part.

The engagement objective was to identify representative security issues within a time-boxed assessment. The Bishop Fox assessment team combined automated network and application scanning with limited manual penetration testing to locate weaknesses. In addition, Bishop Fox reviewed the self-assessment questionnaire completed by Hunter Web Services. For more information on Bishop Fox's testing approach, please see Appendix B.

This letter confirms that the testing of the Hunter.io application and external infrastructure has been completed. Hunter Web Services has been provided the detailed findings and recommendations resulting from the assessment in an assessment report. At the time of this letter, all critical- and/or high-risk findings have been remediated.

Testing for this engagement concluded on December 21, 2021. This letter is valid until January 14, 2023.

Sincerely,

Thomas Wilhelm
Regional Director
Bishop Fox
